Dear HAEi Friends,

HAEi maintained a laser sharp focus on expanding our global network of HAE patient groups throughout 2017. We continued to meet our growth objective and HAEi now has 61 member organizations actively working on behalf of patients within their countries to increase diagnosis and win access to modern HAE therapies. In light of our growth, and to maintain the level of services HAEi provides, we expanded our network of Regional Patient Advocates to cover Central Eastern Europe, South East Europe, Mediterranean, Middle East/Gulf Region, Sub Sahara Africa, and Latin America.

The power of patient advocacy is accelerating, and we are now witnessing a Global HAE movement. HAEi is doing everything in its power to support and accelerate our Member Organization’s (MO) grass roots advocacy efforts. Towards that end, in 2017 we launched HAEi Connect—a security and EU-GDPR compliant multifunctional database that our MOs can use to manage, grow, and communicate with their patient community. We also re-launched our website hosting program and encourage MOs to take advantage of this free service.

Finally, recognizing that our HAEi youth are the future leaders of the global HAE patient movement, we held a HAEi Youngster’s Summer Camp in Frankfurt, Germany. An enthusiastic group of youngsters spent a weekend interacting with their peers, learning about HAE, and sharing stories about how they cope. The group also decided to organize and form a HAEi Youth Group. We look forward to the ideas and enthusiasm that the Youth Group will inject into our future plans and programs.

The following pages provide additional details about our 2017 activities.

Warm regards,

Henrik Balle Boysen and Anthony J. Castaldo
Executive Director President

HAEi Vision
HAEi's global vision is to improve time to diagnosis and facilitate access to and reimbursement for treatment that enables lifelong health.

As a global umbrella organization, our objective is to develop a network of national member organizations that advocate for HAE awareness and access to modern therapy. Currently, HAEi is represented in 61 countries worldwide.

In some countries, we have fairly large member organizations while in others there are a few enthusiastic advocates. The prospect for expanding global access to HAE treatments motivates us to inspire the formation of new HAE advocacy groups, and to help existing member organizations expand their activities.

HAEi Mission
1. Helping to find, organize, and empower patients with an interest in forming new HAEi member organizations.
2. Supporting our existing member organizations in their ongoing efforts to grow their organizations and raise HAE awareness, increase diagnosis, and advocate for patient access to and reimbursement for modern life-saving therapies.

Overview of HAEi
Supporting the development of new member organizations is one of HAEi's core activities. We actively seek out interested patients or physicians who wish to make a difference and establish a member organization in their country.

In 2017 we welcomed another six member organizations, bringing the total number to 61. Current information on HAEi’s global presence can be found at www.haei.org. The website includes an updated list of organizations by country as well as a searchable map with a listing for each country including contact data for the member organizations. The website also provides the visitor with information on care centers, hospitals, and physicians as well as available medications.

**This year:**
- Six new member organizations established bringing us to a total of 61 by the end of 2017

**Next year:**
- Focusing on Asia and Africa we aim to further increase the number of member organizations.
Supporting member organizations globally

In January 2016 HAEi appointed the first Regional Patient Advocates (RPAs), dividing a large portion of the world between them. Initially the role of the RPAs were to support the member organizations already in place, but later on, they have helped in setting up more or less formal groups in countries where no organization have existed.

Today there are six RPAs:

- **Natasa Angjeleska (Macedonia) – South East Europe/Balkans**
  Natasa is the dedicated mother of a boy with HAE. Her professional background is in educational sciences so she believes that if you educate people, you can achieve a lot. Her focus is on raising public awareness for HAE and educating patients and medical staff for HAE in the South Eastern European countries, thus making a difference in the quality of life.

- **Maria Ferron (Spain) – Mediterranean**
  In the spring of 2016, Maria joined the organization as HAEi Regional Patient Advocate representing the Mediterranean countries. Maria is an HAE patient herself as are her father and both her sisters. She is Spanish, and after a period living and working in Malta, she is now back in Spain.

- **Patricia Karani (Kenya) – Sub-Sahara Africa**
  Patricia was born in Nairobi, Kenya where she is currently residing. She holds a university degree in Sociology and Economics as well as a higher advanced diploma in Human Resource Management, and she has a decade of experience in the HR field. Patricia, who was diagnosed when she was about 18 or 19 years old, is the founder of HAE Kenya.

- **Rashad Matraji (United Arab Emirates) – Gulf Region and Middle East**
  Rashad was born and raised in Tripoli, Lebanon where he studied engineering. In 2007 he moved to Dubai, United Arab Emirates. Rashad has been involved in HAE advocacy in his region since 2011. Rashad, who was diagnosed in 2009 but has experienced symptoms since he was less than a year old, lives with his wife and two children in Dubai, United Arab Emirates.

- **Michal Rutkowski (Poland) – Central and Eastern Europe**
  Co-founder and President of HAE Poland Michal has been involved in HAE advocacy in his home country since 2005. He became Vice President of HAEi in 2011. Michal was diagnosed with HAE at the age of 17. He is an architect and project manager, living with his wife, daughter, and son in Krakow, Poland.

- **Javier Santana (Puerto Rico) – Latin America**
  With over 15 years of experience, Javier specializes in creative communications strategies. His expertise ranges from political campaigns to pharmaceutical marketing, large-scale product and event launches. He has directed strategies for website platform designs and social media integration, as well as launching mobile apps and directing production teams. He designs and manages content for the Puerto Rico HAE Association Facebook page and helps coordinate patient conferences and events.

Read more about the countries covered by the RPAs at haei.org/organization/meet-the-rpas

The Regional Patient Advocates

- Michal Rutkowski; Central and Eastern Europe
- Maria Ferron Smith; Mediterranean
- Natasa Angjeleska; South East Europe/Balkans
- Patricia Karani; Sub-Sahara Africa
- Javier Santana; Latin America
- Rashad Matraji; Gulf Region and Middle East
- Maria Ferron and Natasa Angjeleska
Supporting the HAE family worldwide

A key part of the HAEi support for patients as well as member organizations throughout the world involves sharing experiences and information. This is done via a number of channels – from the HAEi websites and social media presence to the HAEi magazine and other publications. Naturally, the annual HAE Awareness Day is also a vital part of the way we support the HAE family around the globe.

HAEi websites

During the year HAEi has further developed the website www.haeday.org, among other things with a presentation of the Regional Patient Advocates and more patient stories.

A growing number of national HAE organizations have their own websites with their own individual hosting solution. However, some of them would like to change hosting or altogether change the look and content of their websites – and others would like to just have a website at all. In order to accommodate any such national organization, we have established a system under the HAEi website allowing us to host national websites as well as provide them with templates for an individualized website – naturally all in their native language and free of charge.

At the end of the year, national websites had been launched for Australia, Ecuador, Greece, Hungary, Iceland, Kenya, Macedonia, New Zealand, Peru, Poland, Romania, Serbia, Spain, and Turkey – and a few more were in the making. Also, we redesigned the campaign website at www.haeday.org in order to better match haeday :-) 2017.

Social media

HAEi uses a number of social media channels to communicate with the HAE family:

- Facebook (2100+ members): www.facebook.com/groups/HAEInternational/
- LinkedIn (280+ followers): goo.gl/QRTMTHL
- Twitter (200+ followers): http://twitter.com/HAEDAY
- YouTube channel (50+ subscribers): youtube.com/user/haedaychannel

HAEi magazine

First introduced at the end of 2012, the HAEi newsletter has developed quite a lot. Thanks not least to the enthusiasm of the national member organizations the content grew from issue to issue and since a newsletter is normally expected to be pretty short we had to realize that it wasn’t really a newsletter any longer.

As a consequence, we decided to introduce ‘Global Perspectives’, a magazine that continues HAEi’s commitment to bringing the readers timely information on the issues, activities, and events that are relevant to the global HAE community. The first issue was launched in December 2016.

We aim at distributing ‘Global Perspectives’ to the now more than 2,500 recipients four times during 2018.

hae day :-) 

We launched the first haeday ;-) in 2012. This was done with the aim to establish a global and national awareness day for HAE and to give our member organizations an annual focal point for awareness and fundraising efforts.

Previously we have kept to supplying the national organizations with a toolkit of documents and information to guide them through key stages of organizing an event, raising awareness through the media and holding meetings with key physicians. However, for 2016 we decided also to organize a truly global HAE awareness event, and 80 people walked part of the legendary Camino de Santiago in northwestern Spain. Coming from Argentina, Australia, Brazil, Canada, Denmark, Hungary, Italy, Japan, Mexico, New Zealand, Spain, Sweden, USA, and Venezuela they joined forces and proved to themselves and others that obstacles are only there to be overcome.

Based on a very positive feedback from the 2016 Camino Walk, we decided to have another walk in 2017. Once again, HAEI had the invaluable help of the Spanish national organization AEDAF in organizing the event. More than 30 people participated from countries including: USA, Mexico, Argentina, Denmark, Spain, Malta, and South Africa. The pilgrims walked four selected stages (20+20+20+5 km) leading them to the pilgrims’ mass in the cathedral in Santiago de Compostela.

Before haeday ;-) 2016 quite a number of people told us that they would have liked to take part in the Camino Walk but were unable to attend. Therefore, we created a website for the HAEi Global Walk and encouraged people around the world to walk for HAE awareness and record their steps!

The idea really caught on, literally all over the world: The campaign opened late April and ran all through May 2016 and including the almost 4,000,000 steps taken during the Camino Walk we registered more than 12,000,000 steps by individuals as well as by groups wanting to be part of the HAE awareness movement.

The global campaign was repeated in 2017, and from 1 April to the end of May 2,120 people in 32 countries across the world took steps for HAE awareness. From all geographical directions people walked for HAE, some on their own, others in larger groups and in total, they took 21,215,757 steps.

HAE Global Conference

The venue for the 2018 HAE Global Conference, Vienna – Austria, was disclosed on haeday ;-) 2017.

This year:

- Further developed www.haeday.org and hosted more national websites through this platform
- Adjusted www.haeday.org
- Introduced more patient stories on the website
- Produced and distributed four issues of the HAEi magazine ‘Global Perspectives’
- Planned and delivered the HAEi Global Walk as well as the HAEI/AEDAF Camino Walk
- Started planning the 2018 HAE Global Conference

Next year:

- Increase the number of member organizations with a national website under the www.haeday.org umbrella
- Update the toolkit to support national awareness events around haeday ;-) 
- Plan and deliver the 2018 HAE Global Walk
- Plan and deliver the HAEI Jakobsweg Walk 2018
- Plan and deliver the 2018 HAE Global Conference
Supporting member organizations globally – education to empower HAE patients

Throughout 2017 HAEi has continued a strong support of the member organizations helping to educate and empower HAE patients:

January
• Met with patients, physicians, and the Philippine Society for Rare Disorders to in Manila where our Philippine member organization was established.
• Met in San Juan, Puerto Rico with a group that established HAE Puerto Rico (on behalf of the US HAEA), and has developed significant experience in HAE advocacy.

March
• Conducted an advocacy workshop with patient leaders and physicians in Bangkok, Thailand. The workshop focused on creative ways to speed up the process of winning access to medicines in Thailand and to arrange an HAE patient/physician workshop in Thailand at a later stage.
• Participated in and presented at our Spanish member organization AEDAF’s Annual Meeting in Madrid.

May
• Conducted meetings in Manila, Philippines with a HAE family that is working with the Philippine Society for Orphan Disorders and an allergy/immunology specialist who has been asked to be the medical advisor. PSOD is assisting in the effort to raise HAE awareness and strategize for approaching the health ministry to discuss access to medicine.

September
• Participated in and conducted the 2017 HAEi South Eastern Europe Workshop in Skopje, Macedonia.

October
• Participated in and conducted the 2017 HAEi Central and Eastern Europe Workshop in Warsaw, Poland.
• Attended the first meeting of a newly formed South Africa patient group in Cape Town.

November
• Participated in and presented at the 20th anniversary of the German patient organization in Berlin, Germany.
• Participated in and presented at the HAE UK Patient Day in Sheffield, United Kingdom.
• Met with our patient group and leading physician team in Bangkok, Thailand to pursue new options to activate our Global Access Program.

December
• Worked with our Regional Patient Advocate for Gulf Region on a new strategic approach for the region.
Advocating for and supporting access to medicine

At the end of September 2017 Pharming Group N.V in association with HAEi announced the appointment of Inceptua Medicines Access as their new distribution partner for the HAEi Global Access Program (HAEi GAP) enabling patients in all countries where Pharming’s product Ruconest is not commercially available to gain access to the drug through an ethical and regulatory compliant mechanism. It is the only known program of this type, which has been initiated through a patient group.

The program is the only global Access Program in HAE. There is currently no cure for HAE, but certain treatments exist to prevent and ease attacks. These treatments are not licensed or available in all countries worldwide, leaving patients unable to prepare for and treat attacks.

Ruconest is the first treatment to be made available through the HAEi GAP program in countries where it is not commercially available. Ruconest is a recombinant human C1-esterase inhibitor, approved by the European Medicines Agency (EMA) and US Food and Drug Administration (FDA) for the treatment of acute attacks of HAE.

HAEi exists to support patients with HAE gain access to HAE therapies to improve their quality of life and potentially be life-saving in the case of a laryngeal attack. Through this partnership with Pharming Group N.V and Inceptua Medicines Access, physicians, who may otherwise have no access to modern HAE therapies, have the opportunity to request Ruconest for their patients, effective immediately.

At the introduction of the partnership Mark Corbett, Executive Vice-President, Inceptua Medicines Access commented: “We are providing a transformational approach to medicines access, we will strive to provide unrivaled service in navigating access to Ruconest for the treatment of patients in need. We are delighted to work with both HAEi and Pharming in delivering what is the only known Medicines Access Program instigated by a patient organization. We will navigate access to this medicine with agility, quality, and regulatory compliance, ultimately to help the treatment of patients in need.”

Find more information about the HAEi GAP at haei.org/hae/global_access_program
HAEिँ Connect helps global member organizations

Over the last months of 2017, HAEिँ concentrated on completing HAEिँ Connect – a member database, communication management tool, and much more we are offering free of charge to its member organizations. In December 2017 we were finalizing the last corrections from the beta phase in Scandinavia, Australia, and New Zealand, and were ready to enroll HAEिँ Connect globally. With HAEिँ Connect our member organizations have an easy way to stay in touch with members of their countries. Having a solid and secure member database is vital for our member organizations – it can and will help them grow their organization.

HAEिँ Connect allows our member organizations to target the information that is sent out to the members, making sure it is relevant for the individual, especially when it is about clinical trials, market surveys, and relevant events. With HAEिँ Connect, our member organizations will also be able to create and send news to their members directly from connect. HAEिँ Connect complies with the EU-GDPR General Data Protection Regulation, ensuring the protection of member information, and is built with the highest possible data security both on storage and login functionality.

Advocating on behalf of patients and engaging healthcare professionals

As passionate patient advocates, HAEिँ constantly seeks input and collaboration with leading HAE experts. Attending medical conferences provides an efficient and cost-effective way to interact with HAE key opinion leaders and other healthcare professionals. During 2017 we attended these meetings:

**January**
- Participated in the Platform of Plasma Protein Users (PLUS) Consensus Conference 2017 in Estoril, Portugal.

**March**
- Participated in the American Academy of Asthma, Allergy and Clinical Immunology (AAAAI) Annual Meeting in Atlanta, USA.

**May**
- Participated in the C1-Inhibitor Workshop in Budapest, Hungary, and chaired a scientific session during the workshop.

**June**
- Participated in the European Academy of Asthma, Allergy and Clinical Immunology (EAACI) Annual Meeting in Helsinki, Finland.

**November**
- Participated in Prof. Konrad Bork’s annual German meeting on HAE in Mainz, Germany.

This year:
- Attended 9 HAE related medical conferences or major meetings
- Held one-to-one meetings with several global HAE experts

Next year:
- Maintain attendance at HAE related medical conferences (global and regional)
A unique, necessary, deeply enriching experience for young people and their families

The first weekend of August 2017 around 50 youngsters and 25 caregivers from all over the world met in Frankfurt, Germany in order to take part in the first ever HAEi Youngster’s Summer Camp.

The main idea of the camp was to help HAE youngsters worldwide build their relationships and their personal network, to empower them, and to give them a chance to have fun. And judging from the response we had during and after the camp that seems to be just what they did.

The HAEi Youngster’s Summer Camp gathered participants from Argentina, Austria, Australia, Brazil, Canada, Denmark, Ecuador, Germany, Greece, Ireland, Israel, Macedonia, Mexico, New Zealand, Peru, Poland, Russia, Serbia, Spain, Turkey, United Kingdom, and the United States of America.

Following the event, we conducted a survey among the participants. While 95% rated their experience at the camp as either ‘excellent’ or ‘good’ a full 100% stated that they would attend an HAEi Youngster’s Summer Camp in the future – and that they would recommend attending such a camp to other youngsters with HAE. Furthermore, 46% said that they are going to do something differently as a result of the HAEi Youngster’s Summer Camp. This includes spreading new knowledge and raising awareness among other patients and doctors, working towards getting the right medication available for free, and keeping in touch with new friends to learn from and help each other.

Based on connections made or strengthened during the youngsters’ track of the 2016 HAE Global Conference in Madrid, Spain and the first HAEi Younger’s Summer Camp in 2017 a group of energetic HAEi youngsters decided to found the HAEi Youngsters Community. Connected via social media, it is an open community for everyone to join, allowing the participants to share, create new friendships and strengthen old ones, discover life-changing experiences by learning about different cultures, countries, and traditions, and make the community something bigger than the disease. As they initiators put it: "Laughing and sharing each other’s daily lives, we understand the feelings and struggles of friends, patients, and caregivers."

With 58 members from 23 countries, the goal of the HAEi Youngsters Community is to walk together for a better quality of life.

"Knowing people who really understands us is as important as having the right medication. It’s not that easy to explain to everyone around us what it is to live with this disease, and knowing that someone beside us really knows makes us feel really relaxed and comfortable. Hop to see everyone again really soon and that doctors continue showing the passion about investigating this disease as Inma and Markus showed to us. Thank you very much again for giving us the opportunity to know you and know each other.

HAEi family is everywhere around the world, we are not alone. Youngsters can be part of this community too and they are the most important of it because they are the future of our organization.

"A unique, necessary, deeply enriching experience for young people and their families."
Updates and looking to the future

The following are some of the areas where HAEi expects to expand its activities during 2018.

**Regional Patient Advocate training**
We will continue conducting Regional Patient Advocate workshops designed to support core skills required to fulfill the role and responsibilities in the regions.

**Youngsters’ Summer Camp**
As there will be a special youngsters’ track at the HAE Global Conference 2018, we will have no Youngsters’ Summer Camp this year. However, as there is a huge interest in bringing young HAE patients together on a regular basis we expect to plan for a 2019 edition of the Youngsters’ Summer Camp.

**HAEi Jakobsweg Walk**
After the successful HAEi/AEDAF Camino Walk on the Camino de Santiago in Spain in May 2016 and May 2017, we are organizing yet another walk. In order to raise awareness, we aim to bring together HAE friends – patients, relatives, caregivers, doctors, nurses, and industry – for the HAEi Jakobsweg Walk 2018.
Just as for the previous walks this is a mutual experience to commemorate the global hae day :) and this time we will be walking part of the Jakobsweg – that is German for “The Way of St. James” – pilgrimage route through Vienna, Austria.

**HAEi Global Walk**
As quite a number of people have told us that they would really have liked to be with us for the HAEi Jakobsweg Walk 2018 but are unable for one or the other reason, we will once more be arranging the HAEi Global Walk.
Anyone interested in participating can do so wherever they are. All they need to do is walk any distance they like wherever they like – on their own or together with others, go to the campaign website at www.haeday.org, and enter their walk. We will then add their steps to those of all the people doing the HAEi Jakobsweg Walk.
The campaign will be open from 1 April to 31 May 2018 – and naturally, the aim is to go beyond the 21,000,000 steps taken globally in 2017.

Fiscal Year 2017

HAEi Expenses by Key Activity Category

HAEi Executive Committee

We are delighted to introduce you to the HAEi Executive Committee:

**Anthony J. Castaldo, President**
Tony is a co-founder of HAEi and has been President since the organization's inception. He also serves as the President of the US HAE Association and on the Board of Directors of the National Organization for Rare Diseases. He dedicated much of his life to driving improvement in HAE care and remains highly motivated by the challenge of global HAE advocacy.

**Michał Rutkowski, Vice President**
Co-founder and President of the Polish HAE organization Michał has been involved in HAE advocacy in his home country since 2005. He became Vice President of HAEi in 2011. Michał was diagnosed with HAE at the age of 17. He is an architect and project manager, living in Krakow, Poland with his wife and two children.

**Alejandra Menéndez, Secretary**
Alejandra is co-founder and Secretary of HAEi. She is a founding member and President of the Argentinian HAE organization. She also works at raising HAE awareness in all of Latin America. A patient herself, Alejandra has two daughters with HAE. She lives in Buenos Aires, Argentina.

**Fiona Wardman, Treasurer**
Fiona is the President of the Australasian HAE organization which she co-founded in 2011. She is also the Treasurer for HAEi. Fiona is passionate about making a difference to HAE patients in her own region as well as globally. A patient herself Fiona lives in Glossodia, NSW, Australia.

**Sarah L. Smith Foltz**
Sarah is a co-founder of HAEi and served as treasurer until 2014. She is a founding member and president of the Spanish HAE association. Apart from Spain, she has supported efforts in Latin America through involvement in the Patient Advocacy Forum initiative. Sarah’s husband and 3 daughters are HAE patients. She lives in Madrid, Spain.

**Jørn Schultz-Boysen**
Jørn holds the position as Treasurer of HAE Scandinavia. He has worked for a number of large Danish corporations including Bang & Olufsen and currently holds a management position with Grundfos. Jørn is a patient himself as is one of his two children. He lives in Struer, Denmark.

**Rachel Annals**
Rachel is Executive Officer of the UK HAE organization. She is focused on patient advocacy and one-to-one support as well as organizing patient events. Rachel is a HAE patient herself. She lives with her husband and daughter in Bridgwater, United Kingdom.

**Beverley Yamamoto**
Beverley serves as the President of the Japanese HAE organization, enjoying greatly being able to contribute to both the national and the global patient organizations. Beverley is a HAE patient herself as is her son. In her day job she is a university professor, living in Osaka, Japan.

**Natasha Jovanovska Popovska**
Natasha is the President of the Macedonian HAE organization. She is very active towards raising awareness on HAE among medical staff and the general public, dedicated to bringing closer the entire Balkan region to tackle HAE. Natasha is a HAE patient herself. She lives in Skopje, Macedonia.

**Nils Berretz**
Nils is working with public relations within HAE Germany and just like his father and younger brother he is a HAE patient, diagnosed when he was born. In 2013, Nils was part of the first HAE-Youngster meeting in Berlin and most recently he has taken part in the HAE film "Escaping the Labyrinth". Nils, who wants to study for social worker, lives in Eschweiler, Germany.
HAEi is a global non-profit umbrella organization dedicated to working with its network of national HAE member organizations to raise awareness of HAE.
